NOVA PRODUCT SPECIFICATIONS & TECHNICAL FACTS

Doc ID: 02_NOVA_Product_Facts.pdf · Engineering Dossier · Effective: 15 Oct 2026

1. Certified Product Specifications

Authoritative engineering bill of materials and physical specifications for the NOVA AeroRun X1 shoe:

Field	Approved Value	Engineering Reference / Standard
Product	NOVA AeroRun X1	Master SKU: NF-AR-X1-2026
Weight	218 g per shoe (Men's Size 9)	Laboratory scale test (ISO 20871)
Upper	Engineered mesh	Monofilament high-breathability weave
Midsole	EVA foam	Responsive everyday cushioning compound
Outsole	Rubber traction outsole	Multi-surface monsoon road compound
Sizes	6–11 (UK / India standard)	Production size mold specification
Intended use	Everyday running and training	Road & track training category

Product Launch Details

- Launch Date: 01 November 2026
- Primary Campaign: Monsoon Running Campaign 2026
- Target Cadence: Daily training miles (5K to 15K weekly road mileage)

2. Performance Evidence Dossier

Certified testing results recorded at NOVA Footwear Performance Laboratory (Bengaluru, India):

Claim	Result	Evidence
Tested durability	Up to 40 km	Performance Test PT-2026-041
Lightweight	218 g	Product Specification PS-2026-018
Injury prevention	Not tested	— (Prohibited from marketing claims)
Guaranteed speed improvement	Not tested	— (Prohibited from marketing claims)

3. Laboratory Testing Notes & Certification Sign-Off

Performance Test PT-2026-041: Multi-stage accelerated road simulator protocol. Ten production samples completed 40 kilometers of continuous tarmac impact at 12 km/h. Outsole lug wear remained below 0.8 mm; midsole EVA foam retained 94.2% energy absorption elasticity. Testing certified up to 40 km. Projections beyond 40 km are unverified.

Certifying Engineer: Dr. K. Ramanathan, Head of Materials Engineering

Accreditation: National Footwear Testing Laboratory · Registration NFTL-2026-88
