NOVA APPROVED & UNAPPROVED CLAIMS REGISTER

Doc ID: 04_NOVA_Approved_Claims.pdf · Legal & Regulatory Affairs · Effective: 28 Oct 2026

1. Master Claims Adjudication Matrix

The authoritative decision register used by VerityBrand reviewers and compliance approvers:

Claim	Status	Evidence
Designed for everyday running	Approved	Product Brief (Intended use classification)
Lightweight performance footwear	Approved	Product Specification PS-2026-018 (218 g)
Up to 40 km tested durability	Approved	Performance Test PT-2026-041
India's #1 running shoe	Not approved	No evidence (requires accredited ranking)
30% lighter than leading shoes	Not approved	No comparison baseline against named competitors
Guaranteed to make you faster	Not approved	No evidence (guarantees banned by claims policy)
Injury-proof cushioning	Not approved	No clinical evidence (medical claims strictly banned)

2. Adjudication Guidelines & The Strict Abstention Invariant

Strict AI Abstention Standard: When a marketing claim lacks approved documentary proof in the NOVA Evidence Repository, the VerityBrand engine must classify it as NEEDS VERIFICATION / UNSUPPORTED CLAIM. The system must explicitly explain what documentation is missing rather than inventing false verdicts.

3. Required Substantiation Pathways for Unapproved Claims

Unapproved Claim Type	Required Evidence to Seek Approval	Approving Authority
Comparative claims (% lighter, faster)	Accredited head-to-head lab testing methodology comparing at least 3 market leading brands.	VP Product Engineering
Superlative ranking (#1 in India)	Published, dated independent retail audit or industry market-share report (e.g. Euromonitor/Crisil).	General Counsel
Extended durability (>40 km)	Certified lab report certifying mileage beyond 40 km under ASTM athletic footwear standards.	Director of QA Testing

4. Regulatory Compliance Attestation

Regulatory Signatory: Meenakshi Iyer, Lead Compliance Counsel
